

Mefta Sadat

Staff Engineer, AI/ML Platform

meftasadat@gmail.com · meftasadat.xyz · linkedin.com/in/meftasadat · github.com/meftasadat

Experience

Staff Engineer, AI/ML Platform — Priceline.com

Mar 2026 – Present

Toronto, Canada

- Building and scaling AI/ML platform infrastructure at Priceline.com.

Staff Software Engineer — Loblaw Digital

Aug 2018 – Mar 2026

Toronto, Canada

- Led the development of Alfred, an internal agent orchestration engine powering many conversational AI applications across the organization. Architected the solution using LangGraph, LangFuse, LiteLLM, Gradio, and MCP servers to enable scalable agentic workflows.
- Designed and deployed enterprise-scale LLM infrastructure incorporating LLMOps best practices. Implemented batch prediction, monitoring, and orchestration systems processing 15 million prompts weekly, leveraging Qdrant for vector search, Vertex AI for ML infrastructure, and Airflow for workflow orchestration.
- Established the company's MLOps platform using Kubernetes, Vertex AI, Seldon, Prometheus, and Grafana, enabling data scientists to streamline the path from exploratory analysis to production deployment. Developed an in-house recommendation engine that eliminated third-party dependencies, resulting in \$200K+ annual cost savings.

ML Software Engineer — ZoneTV

Jun 2017 – Aug 2018

Toronto, Canada

- Architected and implemented machine learning model-serving and retraining infrastructure on a hybrid multi-cloud platform spanning AWS and Azure.
- Designed and deployed a production-grade recommendation system using Azure Machine Learning and Apache Spark on AWS EMR, serving major clients including TIVO and Virgin Media UK. This implementation was featured by Microsoft as a customer success story.
- Developed serverless RESTful ML model serving applications using AWS Lambda, API Gateway, and the Chalice framework, ensuring scalable and cost-effective inference for enterprise clients.

Research Assistant — Toronto Metropolitan University

Sep 2015 – May 2017

Toronto, Canada

- Conducted research on software quality assurance by implementing machine learning techniques including recommender systems and probabilistic classifiers to predict defect rediscovery in commercial and open-source software projects under the supervision of Dr. Andriy Miranskyy and Dr. Ayse Bener.
- Received nomination for the Governor General's Academic Medal from the Computer Science Department in recognition of outstanding academic achievement.

Education

Master of Science in Computer Science — Toronto Metropolitan University (TMU)

Sep 2015 – May 2017

Talks & Presentations

Integrating multiple MLOps tools together on Google Cloud Platform at Loblaws

Jun 2021

MLOps World Conference · Toronto, Canada

Setting up an ML Platform on GCP for Loblaws - Lessons Learned MLOps Community Meetup · Virtual	Dec 2022
MLOps Panel Discussion - Building Production ML Systems at Loblaws MLOps Community Event · Virtual	May 2023
Alfred: Loblaw's Agentic Orchestration Layer for E-commerce Agentic AI Talk · Virtual	Nov 2025

Publications

Rediscovery datasets: Connecting duplicate reports

Mefta Sadat, Ayse Basar Bener, Andriy Miranskyy — *2017 IEEE/ACM 14th International Conference on Mining Software Repositories (MSR)*, May 2017

A probabilistic approach for modelling user preferences in recommender systems

Parisa Lak, Can Kavaklioglu, Mefta Sadat, Martin Petitsclerc, Andriy V Miranskyy, Graham Wills, Ayse Basar Bener — *CASCON*, Jan 2017

Preliminary investigation on user interaction with ibm watson analytics

Parisa Lak, Mefta Sadat, Carl Julien Barrelet, Martin Petitsclerc, Andriy Miranskyy, Craig Statchuk, Ayse Basar Bener — *Proceedings of the 26th Annual International Conference on Computer Science and Software Engineering*, Jan 2016

On Predicting Rediscoveries of Software Defects

Mefta Sadat — *Toronto Metropolitan University*, Jun 2017

Recognition of human affection in smartphone perspective based on accelerometer and user's sitting position

Rasam Bin Hossain, Mefta Sadat, Hasan Mahmud — *2014 17th International Conference on Computer and Information Technology (ICCIT)*, Dec 2014
